Notes

The survey was carried out in February 2018. Of the 100 respondents, 60 were male and 40 were female, and ages ranged from 18 to 84, with the average age being 51. You may think it is appropriate to tell teams some or all of this information as it could help them when they are coming up with their guesses.

There are a variety of ways this quiz round could be marked. Our recommended method would be to award one point for each answer a team has put down that matches a "top 5" answer, irrespective of position.
