

WHY MIGHT THEY BE **AT RISK** OF BECOMING HOMELESS?

SLEEP OUT

Consider the two scenarios below. Why might each person be at risk of becoming homeless?

Daniel was in the care system, and when he turned 18 had to find his own place to stay.

The only house offered to him by his local council was a second floor flat in a building where the lift was always broken.

He was told that if he refused this flat, he wouldn't be offered anywhere else.

Beth is part of a large family with 5 other siblings.

Her parents are always away from home working, often resulting in no one being available to take her and her siblings to school.

She spends most of her time looking after her younger siblings, making them meals and making sure they're ok.

This means she misses a lot of school, and struggles to keep up with her homework.
